

ChatGPT Content Generator + Blog

Compatibility

PrestaShop 1.7.5 – 8.x

Goal

GENERATES, TRANSLATES or REWRITES unique SEO-optimized descriptions for products, categories or pages using ChatGPT AI. Our new secret weapons: **AI-generated BLOG & product SPIN-OFFs** will boost your SEO and sales!

New! BLOG functionality provides AI-generation of posts for the specified products. Internal cross-linking through SEO related posts appearing on product pages and vice versa - related products appearing on posts.

New! SPIN-OFFs functionality allows you to increase your sales and SEO with ChatGPT AI - generate multiple pages for the same product, expand your product offerings and enhance content generation.

Benefits for Merchants

- You **don't pay** for using ChatGPT additionally! **Any language** is supported!
- **GENERATES, TRANSLATES or REWRITES** the content for products, categories or pages **using ChatGPT AI**
- Built-in **BLOG with the posts generated by ChatGPT AI** will boost your SEO
- **Product SPIN-OFFs generator by ChatGPT AI!** Can one product have multiple sales pages for it? Easily!
- Generate **product descriptions** and characteristics **based on EAN**
- **Statistics of used word** limits for content generated **by ChatGPT AI**
- **Custom request templates** for maximum flexibility
- Each spin-off product can have **individual or common stock**, so the product can be ordered from any page
- Spin-off pages will be added to the **XML and HTML sitemaps** of the site
- Blog posts have **SEO-markup JSON+LD** and a section with **related products**
- Blog can generate posts for the specified product

Benefits for customers

- Site visitors will see high-quality text product descriptions, categories and pages easily generated by ChatGPT
- Blog posts and product Spin-offs will increase the number of indexed pages with unique SEO content generated by ChatGPT or edited manually by the admin
- Internal crosslinking of blog pages and spin-offs will boost your SEO tremendously
- It does not matter for visitors where to order the product: the main page of the product or any of its spin-offs or blog posts – the cart with the checkout is the same!
- Stock of the product could be common for all spin-off pages together with the main product page or individual (at the choice of the administrator)

Features

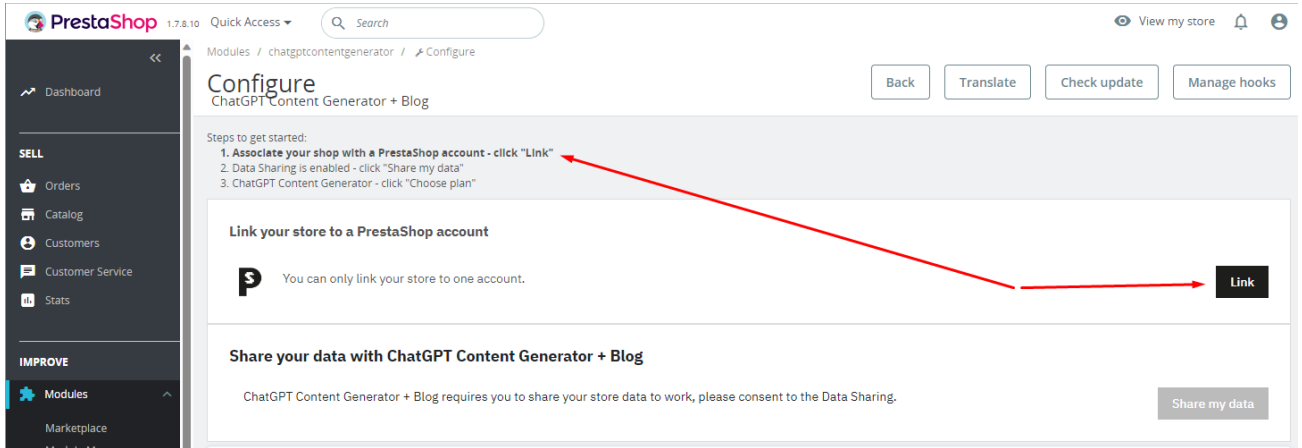

- **Multilanguage** compatibility and no extra fees for ChatGPT usage
- **Generate, translate or rewrite** everything: products, pages or categories by ChatGPT
- Unlimited number of **product Spin-Offs** generated by ChatGPT
- **XML and HTML sitemaps for Spin-Offs**
- **AI-generated blog** with the posts dedicated to products
- **Blog posts** with the recommended products
- SEO - markup

1. Main page

1.1. Account connection

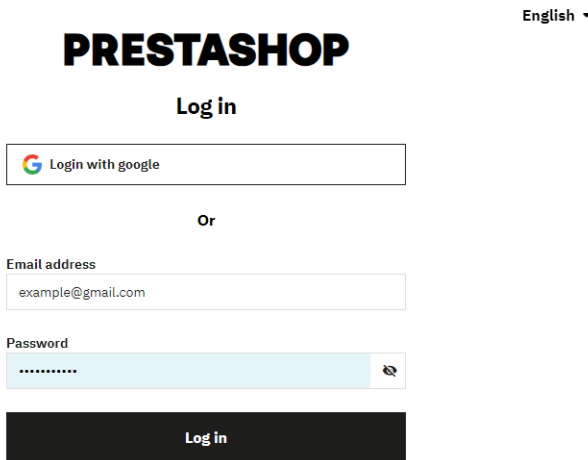

In order to start working with the module, you need to link it to your personal account registered on **Prestashop Addons** <https://addons.prestashop.com>

The "Link" button opens a pop-up window where you need to authorise (via login and password) and confirm the store's connection with your account.

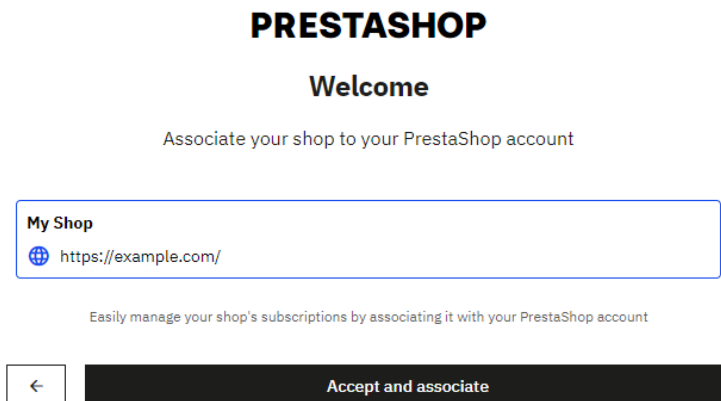

To do this, you need to confirm access to the store data by clicking the "Login in" and "Accept and associate" buttons.

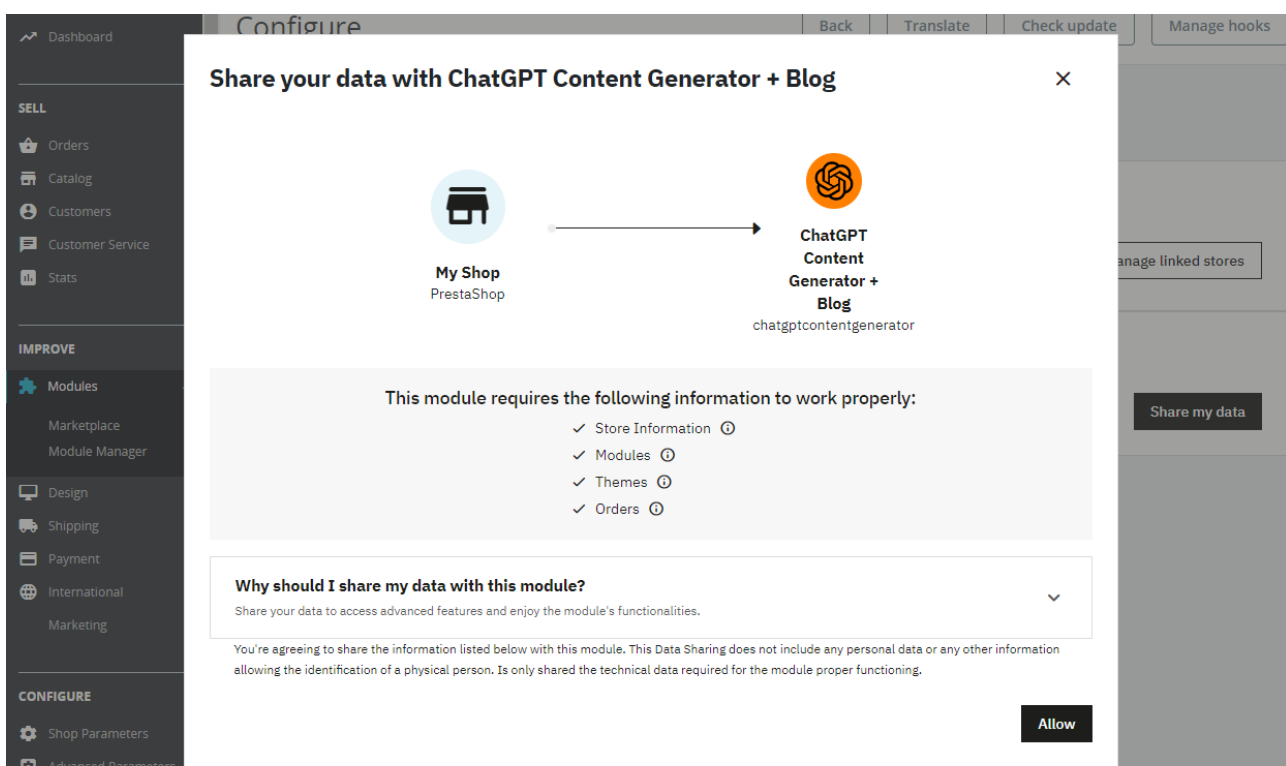

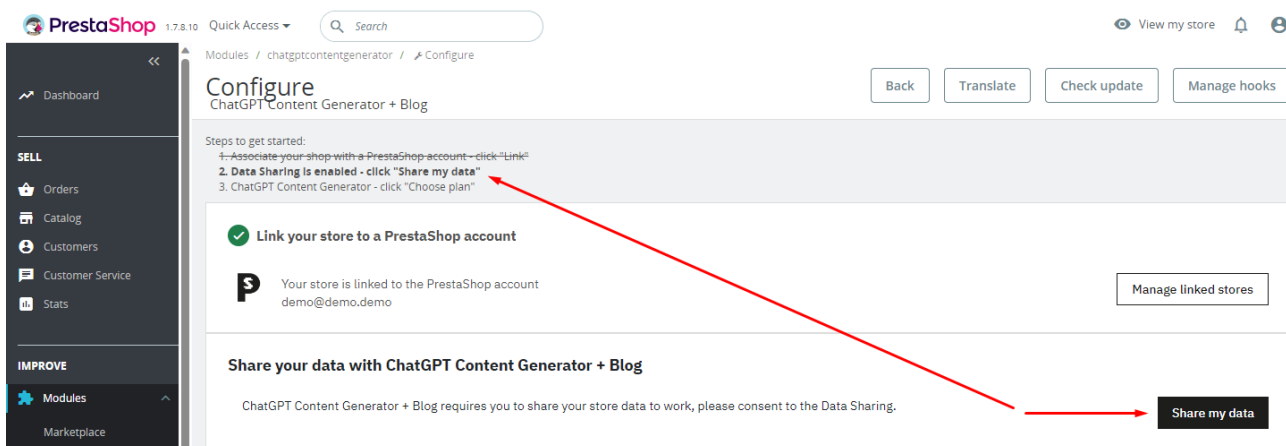

- "Login in" button to complete the authorisation:

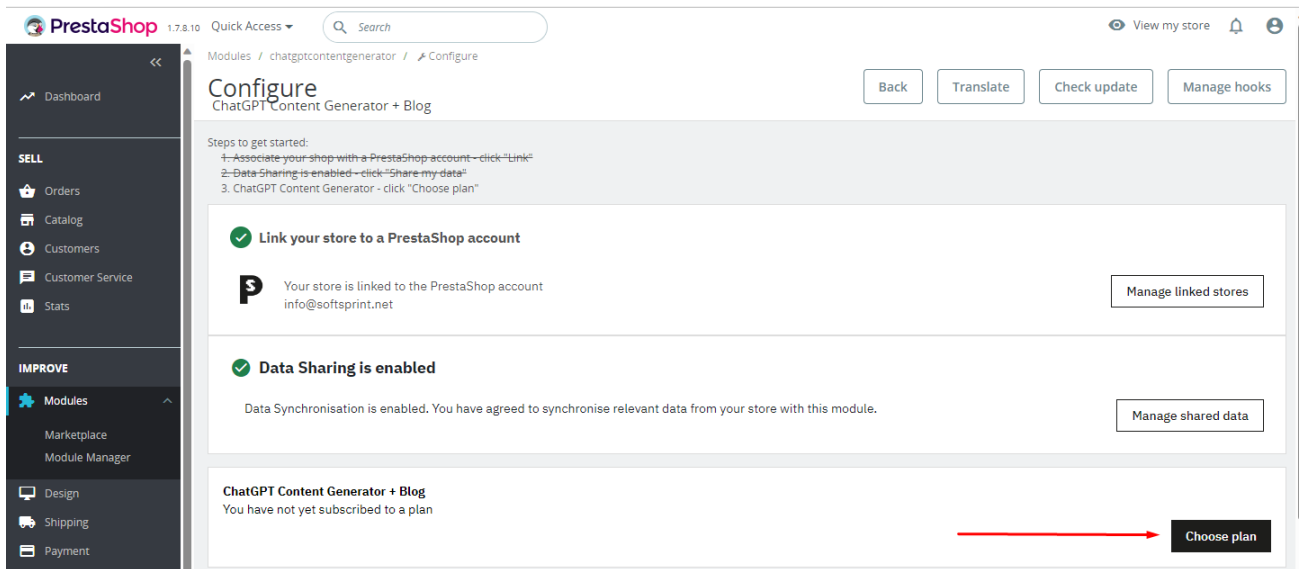

- "Accept and associate" button to complete the sequence of your module with the official Prestashop service:

- **“Share my data”** button lists the data types used by this module. By clicking this button, you allow the data exchange between the module and your store:

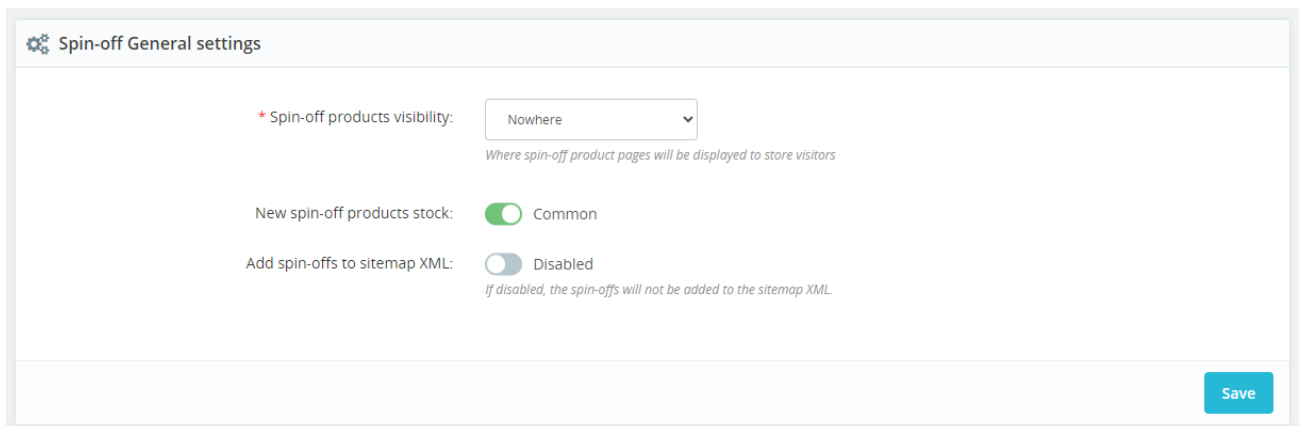

- **“Choose plan”** button is needed to choose a subscription plan and activate it for using the functionality of the module. You will be suggested to choose a tariff and pay for it.

1.2. Spin-off General settings

The global parameters of the module affect all created spin-offs.
The form has the following fields:

- **Spin-off products visibility** – sets the visibility mode of spin-off products:
 - **Everywhere** – spin-off products will be visible everywhere
 - **Catalog only** – spin-off products will be visible only in the catalog
 - **Search only** – spin-off products will be visible only in search
 - **Nowhere** – spin-off products will be hidden everywhere
- **New spin-off products stock** – choose how the quantity of spin-off products will be calculated:
 - **Individual** – quantity is calculated individually for each new spin-off product
 - **Common** – quantity of the spin-off product is tied to the parent product
- **Add spin-offs to sitemap XML** – whether to add links to spin-off products to the XML sitemap:
 - **Enabled** – spin-offs will be added to the sitemap XML
 - **Disabled** – spin-offs will not be added to the sitemap XML

1.3. XML Sitemap

If the "Add spin-offs to sitemap XML" function is enabled in the module settings, the generated products will be automatically added to the site map generated by the "Google sitemap" module.

Spin-off General settings

* Spin-off products visibility:
Where spin-off product pages will be displayed to store visitors

New spin-off products stock: Common

Add spin-offs to sitemap XML: Enabled
If disabled, the spin-offs will not be added to the sitemap XML.

Add Template

* Status Enabled

* Template name

* Template type

- Product
- Category
- Page

Add Template fields

- **Status** – status of template Enabled / Disabled
- **Template name** – template name for internal use
- **Template type** – where the template will be used
 - **Product** – product page and products list
 - **Category** – category form and categories list
 - **Page** – cms page

After saving the settings, the template editing page will open.

Edit Template (Product)

* Status Enabled

* Template name

* Request to ChatGPT
en ▾

You can also use the following shortcodes. The shortcodes will be replaced by the product values in the request

Product shortcodes: `{product_name}` `{product_description}` `{product_description_short}` `{product_tags}` `{product_reference}`
`{product_weight}` `{product_default_category}` `{product_categories}` `{product_category_description}` `{product_brand}` `{product_attributes}`
`{product_features}`

Product features: `{feature.Composition}` `{feature.Property}` `{feature.EAN}`

Edit Template (Product) fields

- **Status** – status of template Enabled/Disabled
- **Template name** – template name for internal use
- **Request to ChatGPT** – template for generating a request to ChatGPT (multilanguage field)
- **Product shortcodes** – available shortcodes which values will be replaced with product ones
 - `{product_name}` – product name
 - `{product_description}` – product description
 - `{product_description_short}` – product summary
 - `{product_tags}` – product tags
 - `{product_reference}` – product reference
 - `{product_weight}` – product weight
 - `{product_default_category}` – product default category name
 - `{product_categories}` – names of all product categories
 - `{product_category_description}` – description of the default product category
 - `{product_brand}` – product brand
 - `{product_attributes}` – product attributes
 - `{product_features}` – product features
- **Product features** – specific product feature (each store has its own features defined by admin)

Edit Template (Category)

* Status Enabled

* Template name

* Request to ChatGPT
en ▾

You can also use the following shortcodes. The shortcodes will be replaced by the category values in the request

Category shortcodes: `{category_name}` `{category_description}`

Edit Template (Category) fields

- **Status** – status of template Enabled/Disabled
- **Template name** – template name for internal use
- **Request to ChatGPT** – template for generating a request to ChatGPT (multilanguage field)

- **Category shortcodes** – available shortcodes which values will be replaced with category ones
 - {category_name} – category name
 - {category_description} – category description

ChatGPT Content Template

Edit: Template for pages

Help

Edit Template (Page) fields

- **Status** – status of template Enabled/Disabled
- **Template name** – template name for internal use
- **Request to ChatGPT** – template for generating a request to ChatGPT, multilanguage field
- **Category shortcodes** – available shortcodes which values will be replaced with page ones
 - {page_name} – page title
 - {page_content} – page content

2. Products ChatGPT functionality

2.1. Generate description

Use **“Generate description”** inside of the product page to call a pop-up window with the settings to run the content generation of the **Description** field:

After the product description generation process is completed, the text is automatically placed in the **Description** field.

Custom request to ChatGPT

The CMS page has a panel for generating page content

Content generation settings

The image shows two screenshots of the 'Content generation settings' panel. The left screenshot shows the 'General' tab with the following settings: 'Add or Replace the existing content' is set to 'Add' (indicated by a green toggle); 'Request template' is set to '-- Use default options --'; 'Maximum number of words' is set to 1000; and 'Languages' is set to 'English (English)'. The right screenshot shows the same panel with 'Request template' set to 'Template for pages' and 'Languages' set to 'English (English)'. Both panels have 'Cancel' and 'Regenerate' buttons at the bottom.

Generate content functionality

- **Add or Replace** the existing content
 - **Add** – generate a new page content and insert generated text after the existing one
 - **Replace** – replace the existing content of the page with a new one
- **Request template** – available templates for request generation
- **Maximum number of words** – maximum number of words to generate text
- **Languages** – languages for which page content will be generated

Translation settings

The image shows the 'Translation settings' panel. It has two dropdown menus: 'Translate from:' and 'Translate to:'. The 'Translate from:' menu is set to 'English (English)'. The 'Translate to:' menu is also set to 'English (English)'. There are 'Cancel' and 'Translate' buttons at the bottom.

4.2. Translate functionality

- **Translate from** – the initial language from which the text will be translated. Only one language can be selected
- **Translate to** – languages into which the text will be translated. You can choose several languages

After the page content generation process is completed, the text is automatically placed in the content field

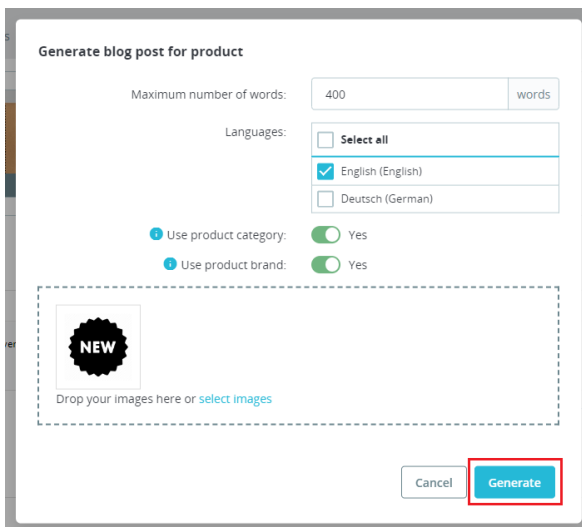

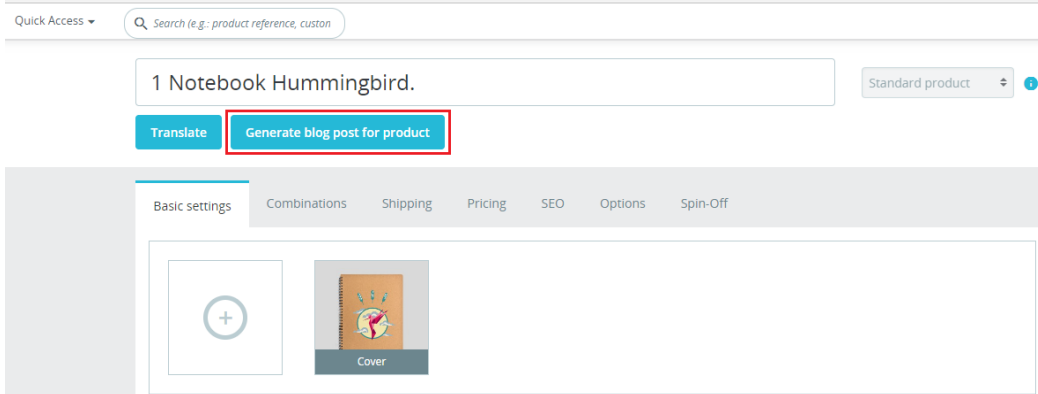

5. Blog functionality

5.1. Generate blog post for product

You are allowed to generate post of the blog inside of the product page using a **“Generate blog post for product”** button:

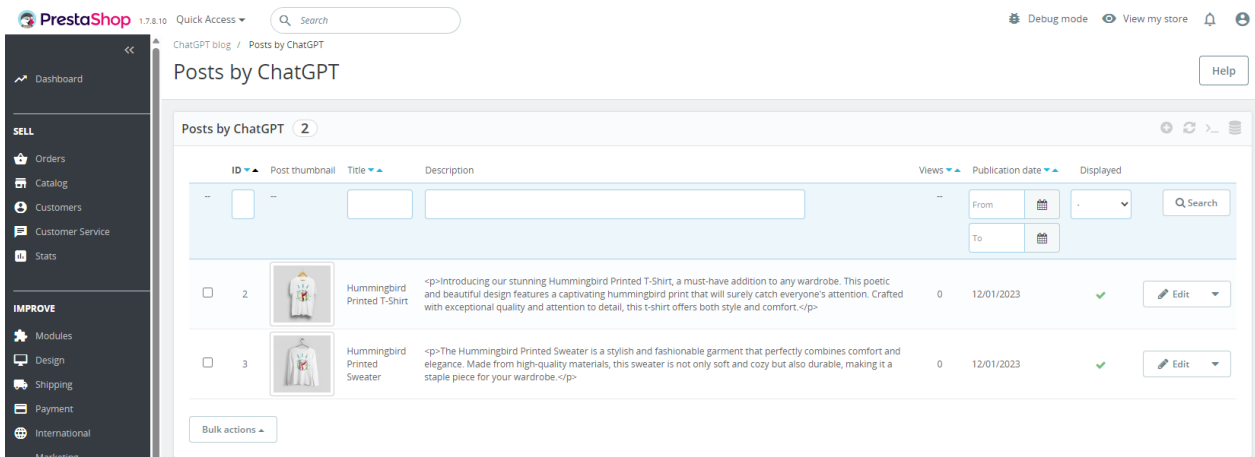

- Limit **Maximum number of words**

- **Languages** – languages for which the product content will be generated
- Ability to **Use product category**
- Ability to **Use product brand**
- Ability to **add images** that will be in the content

5.2. Posts by ChatGPT

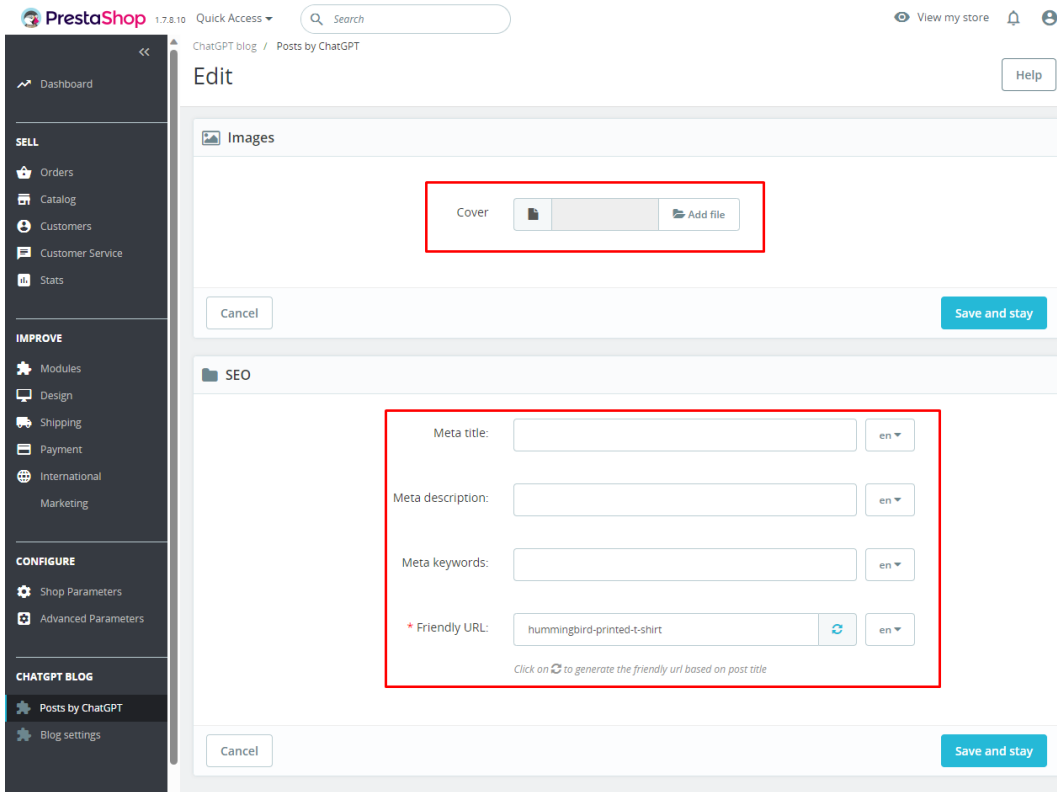

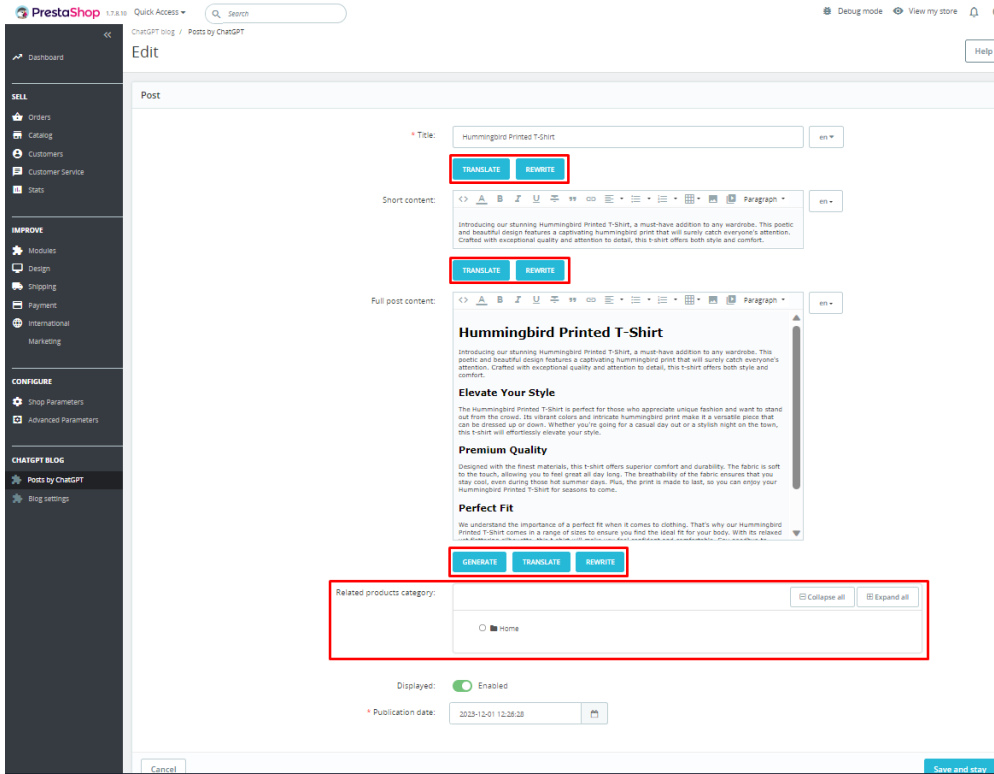

View posts generated by ChatGPT or added by the user.

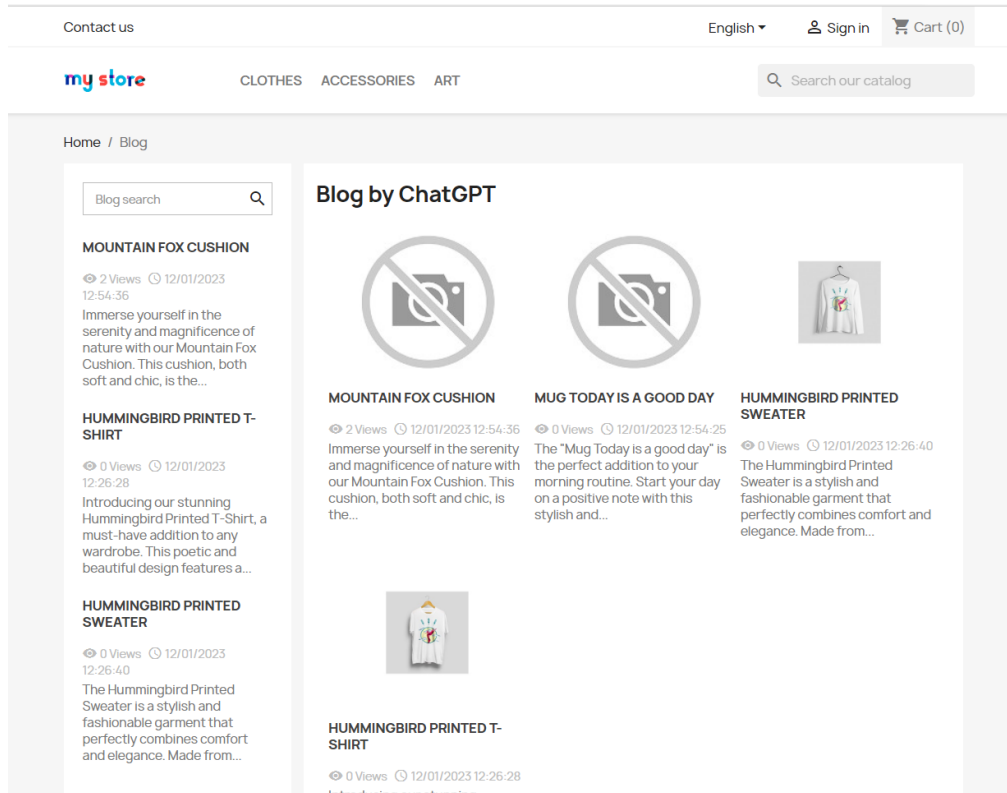

Adding and editing a post

- **“Translate”** button applied to **“Title”** or **“Short content”** and **“Full post content”**

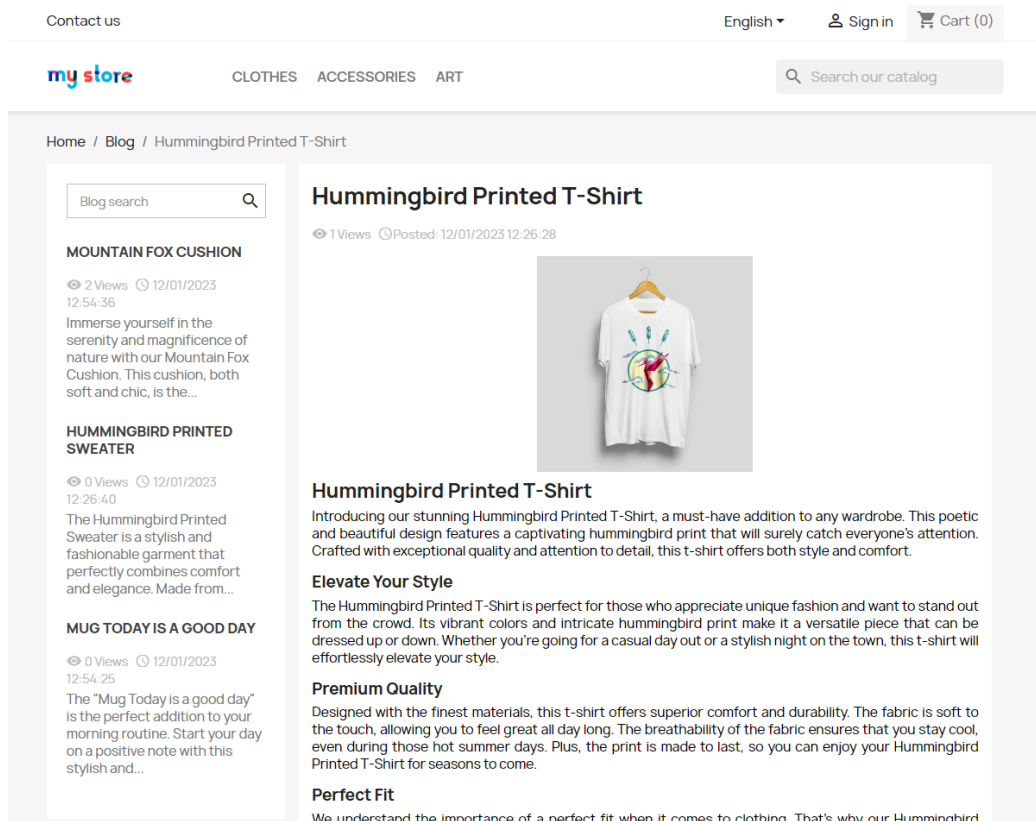

- “Rewrite” button applied to “Title” or “Short content” and “Full post content”
- “Generate” button applied to “Full post content”
- Attach a product category. (Products from this category are displayed under the post.)
- Uploading the cover for the post.
- Setting Meta tags (title, description, keywords).

- Blog home page will look like this:

- Blog post will look like this:

- "Related product" section on the post:

Whether you're pairing it with your favorite jeans, dressing it up with a skirt, or layering it under a blazer, the Hummingbird Printed T-Shirt is incredibly versatile. Its unique design adds a touch of charm to any outfit, making it a statement piece on its own or a perfect base for layering. Get ready to effortlessly create countless fashionable looks with this wardrobe essential.

Own Your Hummingbird Printed T-Shirt Today

Don't miss out on the chance to own this captivating Hummingbird Printed T-Shirt. Embrace its beauty and charm, and let it become a staple in your wardrobe. Order yours now and experience the perfect blend of style, comfort, and quality.

6. Spin-off functionality

6.1 Spin-off tab settings

This tab is displayed on original product pages only (spin-off products do not display it):

- **Spin-Offs** - a list of spin-offs that have already been created for this product
- **Add new spin-offs** - button to generate new spin-offs for this product

Table columns:

- **ID** – ID of the spin-off product
- **Name** – name of the spin-off product
- **Quantity** – total number of spin-off products
- **Stock type** – quantity status:
 - **Common** - quantity of the spin-off product is tied to the parent product
 - **Individual** - quantity is calculated individually for each new spin-off product
- **Price** – the price of the spin-off product
- **Active** – spin-off product status
- **Actions** – product action buttons (edit, view, delete)

The screenshot shows the PrestaShop admin interface for a product named "Brown bear notebook". The interface includes a search bar, navigation menu, and a "Spin-Off" tab. The "Spin-Offs list" table displays the following data:

ID	Name	Quantity	Stock type	Price	Active	Actions
36	Brown bear notebook	1200	Common	€12.90	Yes	
35	Brown bear notebook	1200	Common	€12.90	Yes	
34	Brown bear notebook	1200	Common	€12.90	Yes	
33	Brown bear notebook	1200	Common	€12.90	Yes	
32	Brown bear notebook	1200	Common	€12.90	Yes	

Click on the "Add new spin-offs" button to generate new spin-offs. A pop-up will appear with a form containing the following fields:

- **Number of spin-offs** – number of spin-offs to be generated
- **New spin-off products stock** – choose how the quantity of the spin-off product will be calculated:
 - **Individual** – quantity is calculated individually for each new spin-off product
 - **Common** – quantity of the spin-off product is tied to the parent product
- **Use ChatGPT** – choose whether to use ChatGPT to generate spin-off content:
 - **Yes** – new spin-off products will receive unique content generated by ChatGPT AI
 - **No** – the content of the spin-off is copied from the parent product
- **Product description** – choose how to generate product description content:
 - **Generate** – new description content will be generated based on product data using ChatGPT
 - **Rewrite** – content will be rewritten based on existing content using ChatGPT
- **Product short description** – choose how to generate product description content:
 - **Generate** – new description content will be generated based on product data using ChatGPT
 - **Rewrite** - content will be rewritten based on existing content using ChatGPT

Ceramic Mug in White Color. Capacity of 325ml.

[Translate](#) [Rewrite](#) of 800 characters allowed

Description

Not only does this mug offer personalization options, but it also boasts a range of other features that make it a standout choice. The ergonomic handle provides a comfortable grip, ensuring that you can enjoy your favorite hot beverage without any discomfort. The generous capacity of the mug allows for a substantial serving, so you can savor every sip without the need for constant refills.

Additionally, the mug is microwave and dishwasher safe, making it incredibly convenient for everyday use. You no longer need to worry about reheating your drink or manually washing your mug after each use. This mug is designed to withstand the rigors of daily life, ensuring that you can enjoy your personalized experience without any hassle.

Perfect for both home and office use, the "Mug That Can Be Personalized" from Studio Design is a versatile accessory that enhances your everyday routine. Start your morning off right with a cup of coffee that is uniquely yours, or brighten up your afternoon tea break with a personalized message. It also serves as a thoughtful and heartfelt gift for birthdays, anniversaries, holidays, or any special occasion.

Studio Design, the brand behind this exceptional mug, is renowned for its commitment to quality and design. With a focus on creating products that inspire and uplift, they have established themselves as a trusted name in the home accessories industry. The "Mug That Can Be Personalized" is a testament to their dedication to innovation and customer satisfaction.

In conclusion, the "Mug That Can Be Personalized" from Studio Design is a must-have accessory for those who appreciate the beauty of customization. With its high-quality craftsmanship, ergonomic design, and user-friendly personalization process, this mug is a standout choice for your home or office. Celebrate your individuality, show your creativity, and enjoy your favorite beverage in a mug that is truly unique to you. Elevate your mornings and make your tea breaks more special with this exceptional personalized mug from Studio Design.
